

FILM Viewer DF-2C15

KYUNG DO

» Feature:

1. Illumination control device on fluorescent lamp helps operator to read films very easily
2. DF-2C15 adopts electronic ballast for switching with high frequency. It would be effective to protect operator's eye against high luminance and flickering of lamp during reading
3. A halogen lamp has a good advantage for reading point defects.
4. Illumination control is available
5. By using foot S/W , operator could save working time for reading
